“Meeting Notes”

SUMMARY

The Mohu "Sky 60" antenna and the Winegard's "Boost XT" antenna amplifier outperforms any other indoor antenna/amplifier. This amazing duo picked up more over-the-air television channels than any other indoor, windows-mounted antenna/amplifier that we have tested.

TOPICS

- Mohu's "Sky 60" Antenna
- Winegard's "Boost XT" Amplifier

MOHU "SKY 60"

- The Mohu "Sky 60" model 110958 antenna is bundled with a Mohu trapezoidal "Jolt" amplifier. However, we do not recommend the use of this "Jolt" amplifier because Winegard's "Boost XT" antenna amplifier was able to receive more over-the-air television channels than the Mohu "Jolt" amplifier that was bundled with the Mohu "Sky 60".

MOHU "SKY 60" (continued)

- When we installed a Winegard "Boost XT" amplifier on our Mohu "Sky 60" antenna, the hybrid antenna/amplifier pulled in more over-the-air television channels than another other antenna/amplifier combination that we tested in an indoor location.

MOHU "SKY 60" (continued)

- Model MH-110958, "Mohu Sky 60"
UPC 854449004859,
date first available = July 27, 2017
per Amazon Web site.

WINEGARD'S "BOOST XT" ANTENNA AMPLIFIER

- Winegard's "Boost XT" antenna amplifier has out-performed any other antenna "pre-amplifier" that we have tested. It is more expensive relative to the cheaper antenna models that we tested but it brings in more television channels:

- **HDTV Antenna Preamplifier - The Winegard Boost XT** TV signal booster enhances any non-amplified antenna, delivering more range and available channels. Delivers a crystal clear signal, watch more channels than with an antenna alone.
- **10x Power Handling Capability - TwinAmp Technology** separately amplifies VHF and UHF signals for maximum performance on any non-amplified outdoor antenna. Signal selectivity is greatly enhanced and noise and interference is reduced to the lowest levels.

- **Amplified Clear Circuit Technology - Boost**
Clear Circuit Technology features the lowest noise figure (1 db typical) to deliver more range and reduce signal dropout and pixelation. The Boost XT preamplifier enhances any non-amplified antenna.
- **In The Box - Includes Winegard Boost LNA-200 digital TV antenna amplifier, 110v adapter, power inserter, hose clamps and printed documentation.**The Boost XT preamplifier works with any passive/non-amplified antenna.
- **Winegard TV Antenna Experts - Leading US designer and manufacturer of quality TV antenna and signal equipment since 1954. Designed and built in the U.S.A.**

Winegard LNA-200 Boost XT TV Preamp, VHF UHF Amplifier

Extend the range and signal quality of your non-amplified digital HDTV antenna with a Winegard TV antenna preamp. Winegard's ultra low-noise amplifiers offer maximum signal quality. Watch more free shows than ever before!

Boost Clear Circuit Technology features the lowest noise figure (1 dB typical) to deliver more range and reduce signal dropout and pixelation. The Boost XT enhances any non-amplified antenna!

TwinAmp Technology separately amplifies VHF and UHF signals. This separation of bands increases signal handling capability for up to 10 times more and reduces intermodulation, thereby maintaining the purest signal path possible.

Size, Compatibility and Features

- Dimensions: 6in x 4in x 4.8in
- TwinAmp Technology separately amplifies VHF and UHF signals
- 10x more power handling
- Bandpass filters remove interfering RF signals
- Installs on any outdoor non-amplified TV antenna
- Maximum Gain (typical): 20 dB
- Noise Figure (typical): 1 dB
- Power: +5V at 130mA
