

CONFIGURE WINDOWS XP TO LOGIN A USER AUTOMATICALLY ON STARTUP

Click on the Windows XP "Start button":

Click on "Run".

A "Run" box will be displayed.

Type in

control userpasswords2

Click on the "OK" button of the "Run" box.

A "User Accounts" dialog box will be displayed.

Click on the user that you wish to automatically log in when Windows starts. This user's name and group membership will should be highlighted in dark blue.

Remove the checkmark from "Users must enter a user name and password in order to use this computer".

Click on the "Apply" or "OK" button.

An "Automatically Log On" dialog box will be displayed.

Enter the user's password into the "Password" and "Confirm Password" boxes.

Click on the "OK" button of the "Automatically Log On" box.

Both the "User Accounts" and the "User Accounts" dialog boxes will disappear.

Whenever Windows starts up, the selected user will now be automatically logged in.
