# SUMMARY

"Windows 10.." comes with it's new, improved Mail app. It is much better than the Mail app that is inside "Windows 8.1".

# TOPICS

- The latest version of "Windows Live Mail" runs fine inside "Windows 10"
- The new, improved "Mail" app in "Windows 10" is greatly improved from the similarly named app in "Windows 8.1"

# "WINDOWS LIVE MAIL" STILL WORKS!

- Rick Rolland asked us to determine whether the latest version of "Windows Live Mail" would survive an upgrade from "Windows 8.1.." to "Windows 10..":

# "WINDOWS LIVE MAIL" STILL WORKS! (continued)

- We installed "Windows Live Mail" of "Windows Live Essentials 2012" into a "Windows 8.1 Pro 64-bit" computer and populated it with an outlook.com account, a Yahoo Mail account, and a gmail account.

# "WINDOWS LIVE MAIL" STILL WORKS! (continued)

- We then upgraded the computer to "Windows 10 Pro 64-bit".

# "WINDOWS LIVE MAIL" STILL WORKS! (continued)

- After the upgrade, we found that "Windows Live Mail" had survived the upgrade with all e-mail accounts, email messages, user-created folders, and user-created contacts in place and operational.

# IMPROVED "MAIL" APP IN "WINDOWS 10"

- Can now download mail from a "POP3" email server (Windows 8.1's mail could not do this)
- Integrated with new "Action Center" for pop-up notifications
- Actually part of "outlook.com" free office software-as-a-service
