Here's a tool you will want to have. It has multiple uses and is simple to use.

It is basically a borescope and can inspect any small space with amazing quality.

You can use it inspect behind dry wall, inside a dark space, locate a leak under the sink, check out the barrel of a gun, and much more, limited only by your ingenuity!

The unit is a 3-foot cable with the Endosnake at one end and a dual connector on the other. One connector is a standard USB plug, the other is a micro-USB plug to use with the Wi-Fi unit.

Figure 1: Endosnake

Figure 2: Wi-Fi unit

The Wi-Fi unit is for use with a cell phone or tablet, either Apple or Android. It creates a temporary network for use with the Endoscope. There is an app for use with the cellphone or tablet.

If you are using a computer or laptop, the standard USB plug is used.

This is a very simple device to operate. The Endosnake unit is about 2 inches long and is 0.39 mm in diameter. It is able to fit into just about any opening. The tip has 6 LED lights to brightly illuminate your image with 720p resolution. Furthermore, it's waterproof.

It comes in a compact zippered case with a compartment for the Endosnake and one for the Wi-Fi unit. In addition, there are 3 attachments that you can use to retrieve what you find inside the space you inspect.

This is a handy tool you will want to have around the house for the many uses you will find for it.
